

Accessing Storia Through Clever at Home

Step 1: Go to Aspen pull up your roster.

Step 2: Click on "Field Set Menu" at the top. It is a 3x4 grid. Scroll down the menu choices to "Google Student IDs" (see picture below). This will provide each student's Google ID which is his/her username. The LASID is the password.

Step 3: Send home each student's login information. Instruct parents to go to clever.com/in/plymouth and sign in with this Google ID. They can then bookmark the page and save their child's login information to make at-home access easy after this initial set-up. Students can access many other PPS applications this way as well!
